

# Self Directed Community Employment Decision Making

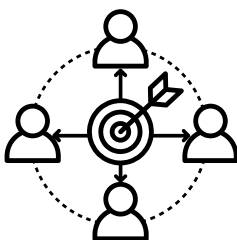

1

## Your Choice

It is your choice what you do for employment. You may make a choice and later change your mind.

2

## Experience

If you have not experienced community employment, you can be supported to gain experience before choosing.

3

## You May Choose Support

If you want to make the choice about community employment independently you may. If you feel you need support to make a choice, you can receive support.

4

## You May Choose Who Supports

You may choose who the best person or people are to support you. You do not have to include people who think they should help you make a choice if you don't want to.

5

## Your Choice Honored

Your choice should be honored, whether or not others in your life disagree. It is your life. You may choose to consider their perspective or not.
